

ECONOMICS MAJOR¹

Program Learning Outcomes (PLOs):

1. Students will develop an ability to critically analyze economic statements and issues.
2. Students will demonstrate understanding of a wide range of perspectives within the discipline, including market and more radical approaches, and will be able to explain how those perspectives are reflected in economists' theoretical models and policy prescriptions.
3. Students will demonstrate the ability to use economic models including supply and demand models of competitive, monopolistic, and oligopolistic firms, consumer/producer optimization models, as well as macroeconomic models such as the Solow growth and AS/AD models to analyze aggregate economic measures, stabilization policies, social issues, and policy problems.
4. Students will demonstrate economic reasoning in concisely written statements, research papers/presentations, and analysis of the economic content of many forms of writing.
5. Students will demonstrate understandings of the wide differences in international economic experiences and living standards.
